SUMMARY

Graduate student in Advanced Computer Science with experience across fintech entrepreneurship, frontline operational leadership, and customer-facing roles in high-pressure environments. Co-founded a digital microfinance startup and gained early exposure to building inclusive financial solutions. Strong interest in financial inclusion, technology-driven strategy, and emerging markets. Adaptable, resilient, and motivated to contribute to impact-focused business and public-private initiatives.

WORK EXPERIENCE

Regional Movie Blog & Influencer Collaboration | Freelance | November 2021 - Present

- Built and managed a niche blog focused on regional cinema news and reviews.
- Coordinated with digital influencers to manage and update their social media pages.
- Secured sponsored content deals and maintained influencer brand pages.
- Handled content creation, publishing schedules, and basic SEO strategy.

Front-End Developer Intern | Scape Tree | July 2022 - December 2022 | Bangalore, India

- As a team, developed and maintained a website front-end using HTML, CSS, and JavaScript.
- Integrated APIs and ensured mobile responsiveness.
- Participated in design reviews and implemented UI enhancements to improve **cross-browser compatibility** and overall user experience.
- Improved UI/UX based on internal design feedback and user testing.

PROJECTS

Multi-Mode Travel Time Visualizer(Shortest Path Finder - University Project)

- Designed and developed a web app that displays estimated travel time and distance between locations for various transport modes: walking, driving, public transport, and flight.
- Integrated **Google Maps API** for route visualization and travel time data.
- Used a commercial **flight data API** (e.g., Skyscanner or Aviationstack) to fetch live flight times and durations.
- Built a responsive front-end using **HTML, CSS, JavaScript** — focused on clean UI and intuitive user flow.
- Applied error handling for API responses.

Portfolio Website – HTML/CSS/JS

- Live: [jagadeeshm27.github.io/webpage](<https://jagadeeshm27.github.io/webpage>)
- Built a responsive personal portfolio with sections for experience, projects, and contact.
- Hosted on GitHub Pages; customized layout and interactive JS form.
- Hosted and deployed the website on GitHub Pages to demonstrate version control and deployment skills.

TECHNICAL SKILLS

Languages: HTML5, CSS3 (Flexbox, Grid, Animations), JavaScript (ES6+), PHP (basic)

Frameworks: Bootstrap, (learning Tailwind CSS)

Version Control: Git, GitHub

Tools: Chrome DevTools, VS Code, Figma (basic), CMS (WordPress), Meta Ads
